Dr. Ida Sami, PhD, MEPD, MSc

Chief Executive Officer | Climate NXT

Ida's LinkedIn: https://www.linkedin.com/in/ida-sami/

Ida is an interdisciplinary researcher with a PhD in Environmental Science, specializing in extreme heat resilience and climate change. As the Director of Research and Impact, Ida leverages AI to drive positive change in areas such as Architectural Engineering, Urban Planning, Brownfield Redevelopment and Extreme Heat Resiliency. Ida is the founder of the Global Heat Resilience Group and a staunch advocate for the heat action plan for all. Ida's work extends to transforming brownfields into sustainable, resilient spaces, and she is deeply committed to championing social justice, especially in redlined areas. Ida is a proud member of the Moms Clean Air Force, and dedicated to advocating for clean air, clean energy and healthy environment for everyone especially children. Ida's experience and collaborations span across South Asia, Iran, Turkey, the USA, and Canada, reflecting her commitment to global resilience and passion for creating a sustainable future for all.
